

Revue d'Épidémiologie et de Santé Publique

Journal of Epidemiology and Population Health

Guide for authors

The journal publishes **in English**:

- Research articles
- Literature reviews
- reviews
- Editorials
- Letters to editor

All manuscripts have to be in accordance with the instructions and style guide below. They are inspired by the standards of presentation of manuscripts proposed by the international committee of the writers of medical newspapers, known under the name of “Group of Vancouver” ([International Committee of Medical Journal Editors](#) - ICMJE).

BEFORE YOU BEGIN

Publication requirements

Submission of an article implies that the work described has not been published previously (except in the form of an abstract or as part of a published lecture or academic thesis), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere in the same form, in English or in any other language, including electronically without the written consent of the copyright-holder. In addition, the authors will not mention in their article any cases or expertise whose proceedings are ongoing and/or awaiting judgment.

To verify originality, your article will systematically be checked by the originality detection service [CrossCheck](#)

The manuscripts are first examined by the editorial board of the journal which decides whether the subject's interest in the journal and the overall quality of the work merit that the manuscript be sent to at least two or three peer-reviewers, selected for their specific expertise. Depending on the opinion of the reviewers, the article may be rejected or modifications/corrections may be requested; it should be noted that the request for modifications/corrections does not constitute acceptance for publication, which is decided only after examination of the revised version. The corresponding authors must obtain the written consent of their co-authors for any changes to the manuscripts.

Ethics in publishing

Work submitted for publication must be conducted in application of current regulations concerning biomedical experimentation and comply with the ethical principles of the Helsinki declaration. More information on [Ethics in publishing](#) and [Ethical guidelines for journal publication](#).

When reporting experiments on human subjects, authors should indicate whether the procedures followed were in accordance with current regulations concerning biomedical experimentation (in

France: [Comité Consultatif National d’Ethique](#)) and the Code of Ethics of the World Medical Association

The Revue d’Épidémiologie et de Santé Publique is a member and abides by the principles of the Committee on Publication Ethics (COPE).

Informed consent and patient details

Studies on patients or volunteers require ethics committee approval and informed consent, which should be documented in the paper.

Appropriate consents, permissions and releases must be obtained when an author wishes to include case details or other personal information or images of patients in an Elsevier publication. Written consents must be retained by the author and copies of the consents or evidence that such consents have been obtained must be provided to Elsevier on request.

For more information, please review the [Elsevier Policy on the Use of Images or Personal Information of Patients or other Individuals](#).

Unless you have written permission from the patient (or, where applicable, the next of kin), the personal details of any patient included in any part of the article and in any supplementary materials (including all illustrations and videos) must be removed before submission.

Declaration of competing interest

All authors must disclose any financial and personal relationships with other people or organizations that could inappropriately influence (bias) their work. Examples of potential conflicts of interest are described below.

The use and declaration of AI and AI-assisted technologies in scientific writing

Where authors use artificial intelligence (AI) and AI-assisted technologies in the writing process, authors should:

- Only use these technologies to improve readability and language, not to replace key researcher tasks such as interpreting data or drawing scientific conclusions.
- Apply the technology with human oversight and control, and carefully review and edit the result, as AI can generate authoritative-sounding output that can be incorrect, incomplete or biased.
- Not list AI and AI-assisted technologies as an author or co-author, or cite AI as an author. Authorship implies responsibilities and tasks that can only be attributed to and performed by humans, as outlined in [Elsevier’s AI policy for authors](#).
- Disclose in their manuscript the use of AI and AI-assisted technologies in the writing process by following the instructions below. A statement will appear in the published work. Please note that authors are ultimately responsible and accountable for the contents of the work.

Disclosure instructions

Authors must disclose the use of AI and AI-assisted technologies in the writing process by adding a statement at the end of their manuscript in a new section entitled ‘Declaration of AI and AI-assisted technologies in the writing process’. *Statement: During the preparation of this work the author(s) used [NAME TOOL / SERVICE] in order to [REASON]. After using this tool/service, the author(s) reviewed and edited the content as needed and take(s) full responsibility for the content of the publication.* This declaration does not apply to the use of basic tools for checking grammar, spelling, references etc. If there is nothing to disclose, there is no need to add a statement.

Role of the funding source

You are requested to identify who provided financial support for the conduct of the research and/or preparation of the article and to briefly describe the role of the sponsor(s), if any, in study design; in the collection, analysis and interpretation of data; in the writing of the report; and in the decision to

submit the article for publication. If there is no funding source(s), this should be indicated.

Changes to authorship

Authors are expected to consider carefully the list and order of authors **before submitting** their manuscript and provide the definitive list of authors at the time of the original submission. Any addition, deletion or rearrangement of author names in the authorship list should be made only before the manuscript has been accepted and only if approved by the journal Editor. To request such a change, the Editor must receive the following from the corresponding author: (a) the reason for the change in author list and (b) written confirmation (e-mail, letter) from all authors that they agree with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed.

Only in exceptional circumstances will the Editor consider the addition, deletion or rearrangement of authors **after the manuscript has been accepted**. While the Editor considers the request, publication of the manuscript will be suspended. If the manuscript has already been published in an online issue, any requests approved by the Editor will result in a corrigendum.

Preprints

Please note that preprints can be shared anywhere at any time, in line with Elsevier's sharing policy. Sharing your preprints e.g. on a preprint server will not count as prior publication (see '[Multiple, redundant or concurrent publication](#)' for more information).

SUBMISSION OF MANUSCRIPTS

Manuscripts should be submitted online via the electronic submission site Editorial Manager (EM): www.editorialmanager.com/respe

MS Word and Wordperfect can be used for text files. **PDF files are not accepted.**

Only those manuscripts respecting the present instructions to authors may be accepted.

ATTENTION! This journal uses double-blind review, which means the identities of the authors are concealed from the reviewers, and vice versa. To facilitate this, please include the following separately:

- *The title page*: title, authors name and affiliations/addresses, the contact author and the declaration of interests of all authors, the role of each in the work and writing of the article. This separate file maintains the anonymity of the authors by excluding their contact details from the manuscript transmitted for review.
- *The manuscript*: summary, key words, text body, references, tables with legends, legends of the figures.
- *The figure* (diagrams, drawings, colour or white and black photos) should always be submitted in individual files i.e. only one figure per file or one compressed folder (.zip) with one file per figure.

In case of technical difficulties, please contact authorsupport@elsevier.com

Referees

Please submit the names and institutional e-mail addresses of two or three potential referees. Do not mention names of persons with whom you have previously co-authored other articles, papers or books, or with whom you may have a competing of interest of any kind.

Note that the editor retains the sole right to decide whether or not the suggested reviewers are used.

For more details, visit our [Support site](#).

PRESENTATION OF MANUSCRIPTS

Types of accepted articles and their specifications are given below. Word count for the main manuscript includes only the main body of text (i.e., not tables, figures, abstracts, references or Supplementary data). All abbreviations (other than those for units of measure) should be spelled out the first time they are used anywhere in the manuscript.

Manuscript should not exceed:

- for **Research article** and **literature reviews**: **no more than 3 000 words** (title, keywords, abstracts, references and tables not included);
- for **editorials** and **letters to editor**: **no more than 2 000 words**.

They must be prepared in accordance with the procedures below. A summary list of the elements to be taken into account is annexed.

Title page

It must include:

- The title should be concise and descriptive;
- The authors' names – first names in full and family names, in lowercase, with a capital initial, and their positions.
- The affiliations and complete postal addresses with departments, institutions for all the authors. If authors have different addresses, their names will be followed by numbers in superscript to link them to their addresses.
- The name and e-mail of the corresponding author who will receive all correspondence concerning the article: requests for a revised version of the manuscript, prior to acceptance, proofs and offprints. Please note e-mail address will appear on the publication.
- The possible competing interests of all the authors;
- The journal also encourages the use of the ORCID identifier to list authors.

Abstract and keywords

- Abstract should count between 200 and 350 words, with no abbreviations or references. It must be structured with Objectives, Patients or Materials and Methods, Results, Discussion, Conclusions.
- The authors will select 3 to 6 keywords from the [Medical subject headings](#) (MeSH) of the Medicus Index of National Library of Medicine.

Text

The text must be written in a clear and concise style. Authors shall ensure correct spelling, syntax and punctuation. Using chapter headings is recommended to facilitate reading. Titles and subtitles of similar importance should be consistently indicated.

Original research articles should include the following sections: Introduction, Patients and Methods, Results, Discussion, Conclusion, acknowledgements, references.

Numbers, units, symbols and commercial names

- Use metric units (SI units) as fully as possible. Use the sign "%" in text, tables and figures (not percent). Scientific symbols must accord with the international norm (for instance "minute" is abbreviated "min" and not "mn")
- In a sentence, numbers from 0 to 10 will be written in full, unless they're followed by an abbreviated unit. At the start of the sentence, the numbers will be written in full.

- All abbreviations, usual or not, of medical and scientific terms must be explained when they first appear in the text.
- For drugs and medication, the recognised INN must always be used. The name of the associated specialities shall be mentioned the first time only, followed by the symbol TM or ®.

Acknowledgements

Collate acknowledgements in a separate section at the end of the article before the references. List here those individuals who provided help during the research (e.g., providing language help, writing assistance or proof reading the article, etc.).

Role of the funding source

You are requested to identify, at the end of the manuscript, who provided financial support for the conduct of the research and/or preparation of the article and to briefly describe the role of the sponsor(s), if any, in study design; in the collection, analysis and interpretation of data; in the writing of the report; and in the decision to submit the article for publication. If there is no funding source(s), this should be indicated.

References

- All references should be **numbered consecutively in the order in which they are first mentioned in the text**. They are indicated in the text by numbers between bracket; in case of consecutive references, they will be separated by a hyphen, for example: [1-4], and by commas, when the references are not consecutive [1,4].
- Up to 6 authors, all the authors' names will be given. From 7 onwards, the six names will be followed by a comma, and "et al." Authors' names are in lowercase, with a capital initial.
- **References are in Vancouver format** (International Committee of Medical Journal Editors. Uniform Requirements for Manuscripts Submitted to Biomedical Journals. Fifth Edition. N Engl J Med 1997;336:309-16).
- **Abbreviations of journal titles** should be made according to the *Index Medicus* (new series) from the National Library of Medicine. You may also find the list on its website <http://www.nlm.nih.gov/tsd/serials/lji.html>

Examples of references

- *A Journal Article*: [1] Atramont A, Rigault A, Chevalier S, Leblanc G, Fagot-Campagna A, Tuppin P. Caractéristiques, pathologies et mortalité des résidents en établissements d'hébergement pour personnes âgées dépendantes (Ehpad) admis au cours du premier trimestre 2013 en France. Rev Epidemiol Sante Publique 2017; 65:221-30.
- *A book*: [2] A. Boutayeb. Disease prevention and health promotion in developing countries. Springer International Publishing 2020. (270 pp).
- *A chapter from a book*: [6] Schuler G, Ruttner JR. Silicosis and lung cancer in Switzerland. In:Goldsmith DF, Winn DM, Shy CM, eds. Silica, silicosis and cancer:controversy in occupational medicine. Cancer research.Vol 2. New York, NY: Praeger, 1986: 357-66.
- *A text on Internet* : Online cited articles should be included with their DOI number. For online material, include title, URL address, date of publication, date you accessed the website, number of pages.
[4] Cancer Research UK, Cancer statistics reports for the UK.
<https://www.cancerresearchuk.org/health-professional/cancer-statistics-for-the-uk> 2020
(accessed July 2020)

Unpublished articles should not be included in the list unless they have been accepted for publication. In this case, mention in press after the name of the journal and the expected year of publication, along with the DOI number in case it is available.

Tables

- Each table must be provided on a separate page, numbered using Arabic numerals according to their order of appearance in the text. Their location must be specified in the text by a reference between parentheses (Table 1). Be sparing in the use of tables and ensure that the data presented in them do not duplicate results described elsewhere in the article
- Prepare tables with Word or Excel. Graphic files are not acceptable for tables.
- It should have its title, and if necessary, additional information underneath. The meaning of all abbreviations and symbols must be specified.
- It is important to remember the size of a screen page when typing tables, for the readability of the electronic version.

Figures

- Figures (graphs, drawings, or photographs) must always be supplied in separate files, one file per document.
- They are numbered with arabic numerals and are cited in the text, in numerical order, with number between brackets (fig. 1).
- Photos should be provided in digital format: JPEG (.jpeg), TIFF (.tif) or PDF (.pdf) with 300 dpi minimum resolution for black and white or colour photographs and 500 to 1000 dpi for graphs or drawing. Word and Excel format are also acceptable. Figures should not be created with commercial software (Powerpoint®, Paintbrush®, MacDrawPro®). In these formats they cannot be used for professional publishing. High resolution is absolutely necessary for printing.
- Each figure must be accompanied by a caption. The legends do not appear in the illustration. They are given in a list at the end of the article, on a separate sheet. Abbreviation must be defined. A figure with its legend must be understandable, without additional text.

Authors are invited to refer to the [artwork and media instructions](#)

Very important note: Any reproduction of previously published figures and tables must be accompanied by written permission from the copyright holder (publisher or author). Authors will do the necessary steps.

Complementary data

Supplementary material such as applications, images and sound clips, can be published with your article to enhance it. Submitted supplementary items are published exactly as they are received (Excel or PowerPoint files will appear as such online). Please submit your material together with the article and supply a concise, descriptive caption for each supplementary file.

For any further information on how to supply your images, consult the web page:

<https://www.elsevier.com/authors/author-schemas/artwork-and-media-instructions>

DISCLOSURE OF INTEREST

In accordance with international practices, all submitted manuscripts must be accompanied with a disclosure of interest.

A competing interest exists when an author and/or co-author have any financial or personal relationships with other people or organizations that might influence his/her professional judgement concerning an essential value (patient's well-being, integrity of the research work...). The main competing interest includes financial interests, clinical trials, punctual interventions, family relationships...

All authors of the publication must declare **any relations** that may be considered as a potential competing interest.

1. **If there is no competing interest**, the following note must be added directly to the manuscript: "The author[s] declare[s] that he [they] has [have] no competing interest".

2. **If there is one (or more) competing(s) interest**, all should be listed on the title page in accordance with the presentation below. The initials of the author(s) concerned, and the name of the company associated should be added to the potential competing of interest needing to be declared.

Examples:

- C.R., E.L. Financial interests in Barbot SA;
- E.L. Owner, manager, employee, participation in a decisional board of a company. Other regular activities in Chups SAS;
- J.J.E. Clinical trials: as main investigator, coordinator or principle experimenter for RTM SARL;
- P.L. Clinical trials: as co-investigator, secondary experimenter, study collaborator for Light & Co;
- F.W. Punctual interventions: expertise reports for EFS Associated;
- M.D. Punctual interventions: consultancy for SFC;
- C.G. Conferences: invitations as speaker for KKS & Son;
- M.S. Conferences: invitations as auditor (travelling and accommodation expenses paid for by a company) for Régis SA;
- M.F. Close family relatives employed in the above example of companies;
- A.D. No competing interest.

OPEN ACCESS

This journal offers authors the possibility to publish their research in Gold Open Access (GOA). Articles are freely available to both subscribers and the wider public with permitted reuse. A gold OA publication fee is payable by authors or on their behalf, e.g. by their research funder or institution. Regardless of how you choose to publish your article, the journal will apply the same peer review criteria and acceptance standards.

For gold open access articles, permitted third party (re)use is defined by the following [Creative Commons user licenses](#):

- **CC BY-NC-ND** (Creative Commons Attribution-Non-Commercial-No Derives). Lets others distribute and copy the article, create extracts, abstracts, and other revised versions, adaptations or derivative works of or from an article (such as a translation), include in a collective work (such as an anthology), text or data mine the article, even for commercial purposes, as long as they credit the author(s), do not represent the author as endorsing their adaptation of the article, and do not modify the article in such a way as to damage the author's honor or reputation.
- **CC BY** (Creative Commons Attribution). Lets others distribute and copy the article, create extracts, abstracts, and other revised versions, adaptations or derivative works of or from an article (such as a translation), include in a collective work (such as an anthology), text or data mine the article, even for commercial purposes, as long as they credit the author(s), do not represent the author as endorsing their adaptation of the article, and do not modify the article in such a way as to damage the author's honor or reputation.

Learn more about [Elsevier's pricing Policy](#).

COPYRIGHT

Upon acceptance of an article, authors will be asked to complete a ['Journal Publishing Agreement'](#). An e-mail will be sent to the corresponding author confirming receipt of the manuscript together with a 'Journal Publishing Agreement' form or a link to the online version of this agreement.

For gold open access articles: Upon acceptance of an article, authors will be asked to complete an 'Exclusive License Agreement'(www.elsevier.com/about/policies/copyright). Permitted third party reuse of gold OA articles is determined by the author's choice of user license (<https://www.elsevier.com/about/policies/open-access-licenses>).

Elsevier supports responsible sharing. Find out how you can [share your research](#) published in Elsevier journals.

AFTER ACCEPTANCE

- **Online proof correction:** Corresponding authors will receive an e-mail with a link to our online proofing system ([ProofCentral](#)), allowing annotation and correction of proofs online. The environment is similar to MS Word: in addition to editing text, you can also comment on figures/tables and answer questions from the Copy Editor. Web-based proofing provides a faster and less error-prone process by allowing you to directly type your corrections, eliminating the potential introduction of errors. If preferred, you can still choose to annotate and upload your edits on the PDF version. Changes concerning the content are not accepted on the proofs, and corrections are limited to typography. The authors will make necessary arrangements for their corrected proofs to be sent to the publisher within two days following receipt, whatever the time of the year. In the case of delay the publisher reserves the right to print the article without the author's corrections.

- **Offprints:** The corresponding author will, at no cost, receive a customized [Share Link](#) providing 50 days free access to the final published version of the article on ScienceDirect. The Share Link can be used for sharing the article via any communication channel, including email and social media.

Corresponding authors who have published their article gold open access do not receive a Share Link as their final published version of the article is available open access on ScienceDirect and can be shared through the article DOI link.

For an extra charge, paper offprints can be ordered via the offprint order form which is sent once the article is accepted for publication. Both corresponding and co-authors may order offprints at any time via [Elsevier's Webshop](#).

Publishing's contact: Respe@elsevier.com

Submission exclusively through the on-line submission web site:

www.editorialmanager.com/respe

Checklist before submission

Please check if the elements below are provided

Section

Check that the manuscript complies with the specifics of the chosen section (structure, length)

Title page

- ✓ Concise and informative title
- ✓ Title
- ✓ Name of the authors in order of appearance on the publication
- ✓ Affiliations of all authors
- ✓ Name and e-mail address of corresponding author
- ✓ The role of each author in their individual contribution to the article;
- ✓ Competing of interests of all authors

Manuscript

- ✓ Abstract
- ✓ Keywords
- ✓ All the tables are cited in the text
- ✓ All the figures are cited in the text
- ✓ All the references are cited in the text
- ✓ Acknowledgments, support and source of funding if necessary
- ✓ References in order of appearance in the text
- ✓ Tables (with titles, descriptions and footnotes)
- ✓ Figure legends
- ✓ Authorizations for the use of material protected by other sources (including the Internet) and consents obtained.

Figures, videos and other complementary materials

Appendices: references and captions in the text; one file per item
