ARTICLE INFO

Article history:
Available online 23 March 2010

The publisher regrets that when the above article was typesetted, there was an error in the author’s name Eric Toussirot. It should be read as follows:

Reply to the correspondence by Eric Toussirot on the original article entitled «Pro-inflammatory effect of leptin on peripheral blood mononuclear cells of patients with ankylosing spondylitis»

We appreciate the interest and correspondence of Eric Toussirot, and we are pleased to answer questions raised by his wonderful work. Eric Toussirot measured leptin and other adipokine concentrations in the serum of patients with established ankylosing spondylitis (AS), and found significantly decreased serum leptin levels in patients with AS [...]. Thus, results may differ under the effects of such factors, and this is also the case with other diseases, as Eric Toussirot suggested [...]. The major difference between Eric Toussirot’s report and our work seems to be the subjects’ demographics.

The publisher apologises to authors and readers for this.
